Professional Experience

Solutions Engineer | *Securitas Healthcare* | 2024– Present

- Nationally recognized engineer for delivering high-impact healthcare technology solutions across the U.S.
- Provide end-to-end system, network, and security engineering solutions for hospitals across the Midwestern region and Latin America.
- Design and implement specialized patient safety and environmental monitoring systems, including Hugs & Kisses infant security technology in labor and delivery units.
- Act as the primary owner for all Latin American projects, leveraging bilingual Spanish–English skills to lead implementations in Puerto Rico, Costa Rica, and Mexico.
- Awarded and recognized for successfully completing complex projects in Puerto Rico, Costa Rica, and Mexico while maintaining excellent customer satisfaction.
- Utilize expertise in radio frequency, networking, systems, and ultrasound engineering to design scalable healthcare solutions.
- Collaborate directly with hospital IT teams and clinical staff to develop tailored, scalable solutions and provide hands-on training.
- Handle project budgeting and resource planning, effectively performing both engineering and project management responsibilities.

Software Engineer | *Entheospace* | Feb 2024 – Present

- Developed and maintained web-based software solutions using JavaScript, PHP, SQL, HTML, and CSS, enhancing operational efficiency across multiple projects.
- Collaborated with cross-functional teams to ensure seamless integration and functionality of systems.
- Conducted comprehensive testing and debugging, improving software reliability by 20%.
- Integrated cloud-based solutions and automation tools, streamlining inventory control and logistics processes.

Account Manager | *V-Clean* | 2022 – 2024

- Managed client relationships and consistently exceeded sales targets, contributing to a 15% increase in revenue year-over-year.
- Created a centralized database to track project phases, boosting efficiency and enhancing client satisfaction.
- Developed a custom website for generating client quotes, reducing the sales process time by 30%.

Procurement Manager | *Jocelynn's Boots (Remote)* | 2019 – 2022

- Sourced and managed product procurement for a leather goods network, ensuring quality and timely delivery across all product lines.
- Proposed and implemented laser-etched leather product solutions, expanding product offerings and driving a 10% revenue increase.
- Maintained strong vendor relationships, reducing lead times by 15%.

Pharmacy Technician | *UMC Lubbock, Las Palmas Medical Center* | 2019 – Present

- Enhanced digital pharmacy operations by addressing technical issues, improving operational efficiency and patient care.
- Compounded and modified prescriptions with a 99% accuracy rate, ensuring compliance with medical standards.
- Recognized as the first pharmacy technician to receive annual recognition by nurses for work, responsiveness, professionalism, and enthusiasm.
- Developed foundational knowledge in medical devices, including pacemakers, to support patient care.

Projects

Machine Learning Tumor Classification

Developed a machine learning model to classify brain tumor tissues from MRI scans. Achieved 95% accuracy using RGB channels on a dataset of over 2,000 images, a significant improvement over grayscale models.

AI Face Detection

Built an AI-powered face detection system using dlib and OpenCV, achieving a 96% average accuracy. The system detects and marks faces in images with bounding boxes, demonstrating high precision across multiple test cases.

Inventory Management System

Designed and implemented a full-stack inventory management system for a small leather goods company. Automated stock tracking and inventory updates, optimizing supply chain operations and improving efficiency.

Particle Simulator

Developed a particle simulation platform using Python, SQLite, and Django. Utilized web scraping to extract periodic table data and simulated interactions between particles, including their physical properties like mass and charge.

Project Management System

System for Securitas Healthcare to manage projects and tasks in a sequential and automated manner.

Engine Map Remover Application

Windows executable to remove hospital maps from Securitas' backend engine to reduce Location Optimization file size.

Education

University of Texas at El Paso | *Bachelor of Science in Biochemistry & Computer Science* | 2024

- *Honors:* Dean's List, Best Medical Science Student, Best Mathematical Student

Skills

- **Programming Languages:** Python, Next.js, Java, JavaScript/jQuery, PHP, SQL, HTML/CSS
- **Technical Skills:** Web & software development, Cloud-based solutions, Automation tools, Hardware/Software troubleshooting, Server communications
- **Medical Knowledge:** Foundational medical device and clinical knowledge (9 years), Pharmacology and disease-state acumen, Medical terminology
- **Soft Skills:** Client management, Problem solving, Communication, Simplifying complexity
- **Sales Skills:** Technical sales, Cross-functional coordination with IT, Clinical, and Security teams, Solution selling, Bilingual customer relationship building, Objection handling

Leadership & Organizations

- **Assisting Project Manager** | Securitas Healthcare Latin-American HUGS Projects
- **Volunteer/Member** | *American Heart Association, University Medical Center, Local Churches*
- **Treasurer** | *Health Occupations Students of America (HOSA)*
- **Member** | *Dr. Bernard Harris Pre-Medical Society (TTU), Coding Interview Club*
- **Research Assistant** | *Texas Tech University, University of Texas at El Paso*
- **Programming Assistant** | *Specializing in back-end development for small businesses and university projects*
